

# SmartBrowse Guide

SmartBrowse, a combination of Search and Browse, adds a whole new dimension to your search experience and produces extensive information in the most efficient manner.

**New!** A SmartBrowse video tutorial is available.

[Click here](#) to view it, or continue reading for more instructions.

You search using SmartBrowse by typing within the Search box in the top right corner of our site.

A screenshot of the SmartBrowse search interface. It features a search input field with a magnifying glass icon and the text "Search". To the right of the input field is a blue circular button with the text "GO". Below the input field is a checkbox with a checkmark and the text "use SmartBrowse".

You can also access the SmartBrowse main page by clicking its name on the top navigation bar.

To begin searching, enter a title, actor, musician, or author. You can also search by language, category or genre, publisher, series, or collection.

**Tip:** You'll usually get better results by entering fewer words. For example, *Harry Potter* instead of *Harry Potter and the Goblet of Fire*.

The SmartBrowse search bar is also equipped with Auto-Complete, which offers search suggestions based on the term typed. [Click here to view a complete description of Auto-Complete](#).

Upon searching via SmartBrowse, initial results appear on the Search Summary page and are grouped by type. Type headings include "exact matches," "title contains," "categories," "publishers," "series," "collections," "people," "languages," and "numbers."

If a type heading is expanded, you can click  to contract it. If the heading is collapsed, you can click  to expand it.

Underneath each type, results are organized by format, such as CD, Blu-ray, and Playaway, and hyperlinked to their corresponding results.

**Tip:** When there are more than 100 products, we also provide a *Top Sellers* link and a *Most Recent* link that will show only the top 100 products or most recent 100 products. Because they're limited to just 100 products, they'll load much faster than a large list.

Upon clicking a search match, SmartBrowse directs you to a sortable list of results. You can sort the results list by clicking any of the column headers and save results to Excel by selecting "Export." [Click here to read more on sorting and exporting in SmartBrowse.](#)

Select any title to view product results for that selection.
